161036  
Read the following passage carefully and answer the questions  
that follow :

In the afternoon Mr. Barua took Rajiv on a tour of the tea garden. Dhekiabari was a big garden of over 800 acres. So they had to go in Mr. Barua's jeep.

161036  
"We'd better start with the nursery where the tea saplings are," Mr. Barua suggested.

The nursery was a wide, low structure with bamboo walls and a roof of thinly spread thatch. One section contained small  
161036  
earthen beds while another housed thousands of small bags  
36  
each containing a tea sapling.

16  
1036

As they drove along, Mr. Barua explained, "Tea plants need a lot

of care. Fertilizers such as nitrogen, potash, and phosphate

have to be added regularly to the soil to keep the tea plants

strong and healthy".

161  
1036

"Nitrogen is the most important of these. With tea, unlike other

plants, the leaves and not the fruits are plucked. Leaves being

the kitchen of plants, a constant supply of nitrogen is necessary

for the plants to grow."

161  
1036

"Plants fall ill too sometimes, you know, with diseases such as

red rust, blister blight and black rot. Then we have to act as

16  
1036

doctors, diagnose the disease and prescribe appropriate medicines."

✓ 1. What is Dhekiabari ?

(A) A house

(B) Tea garden

(C) Vineyard

(D) A mountain

161036

✓ 2. What is added to the tea plant regularly ?

(A) Water
